Focus Care

Inspection-readiness checklist

A working review for Pennsylvania residential provider teams. Check the evidence you can find, then record gaps on page 2.

Site / programme: _____ Reviewer: _____ Date: _____

Rights that fit the person

- ☐ Find rights information in a format the person understands.
- ☐ Review restrictions against the ISP and documented rights-team review.
- ☐ Check whether staff can explain the rights of the people they support.

Fire-safety evidence

- ☐ Review individual evacuation plans and drill records across shifts and conditions.
- ☐ Locate documented smoke-detector checks and fire-extinguisher inspections.

Medication records

- ☐ Check medication-administration training certificates and renewal dates.
- ☐ Compare a medication log with prescriber orders and pharmacy labels.
- ☐ Review PRN notes for context, outcome and follow-up; check storage and expiry.

Training that matches the work

- ☐ Compare training evidence with the needs of the people each staff member supports.
- ☐ Check orientation completion against the first solo shift.
- ☐ Locate ISP-specific training evidence, not only an attendance signature.

Physical site review

- ☐ Review accessible hot-water temperatures and emergency-egress windows.
- ☐ Check storage of cleaning supplies and sharp objects.
- ☐ Note broken fixtures, lighting and other repairs that need follow-up.

Use this to organize a review, not to certify compliance. You confirm completion and review requirements. Tools support your oversight; they do not guarantee compliance. The provider makes the final decisions.

Focus Care

Turn missing evidence into follow-up.

For each unchecked item, note where the record should be, who will review it and when you will check again. Keep care information in your own approved systems.

Area / missing evidence	Owner / next step	Review date
_____ _____	_____ _____	_____
_____ _____	_____ _____	_____
_____ _____	_____ _____	_____
_____ _____	_____ _____	_____

Before you close the review

- ☐ Give each missing record or repair a named owner and a review date.
- ☐ Keep required staff records, training evidence and renewal dates together.
- ☐ Confirm completion and unresolved items through your provider review process.
